

April: The Chapter Hits its Stride

Our chapter took a big step forward as an organization during the month of April. At our April meeting, those in attendance elected the executives and board of directors for the chapter. With your input, these volunteers will hone the chapter's vision and create tangible goals to strive toward. It's only with your help that we can then achieve these goals.

While the process of prioritizing projects and defining long-term goals will take time, chapter members are already participating in many ways. In April alone, our members worked at the restoration of Ox Pasture Brook, counted fish passage on both the Parker and Ipswich Rivers, assisted First Light Anglers with their stocking of sea run trout in the Mill River, and enjoyed a relaxing day paddling and fishing on the Parker. It's exciting to see new faces showing up at every event. We're seeing a great mix of young new members and guys "who've been at it for a while" – it's this mix of old and new that will help us meet with success in the years to come.

See you soon,

Kevin Correa
