

## **NorEast Chapter Stalks Brookies July 11**

From Kevin Correa 6/18/2010

Happy Summer Nor'East Chapter:

The newsletter editor is taking a break from his writing duties this month, but will pound the keyboard again in July. In lieu of a July meeting, we are going to have a streamside gathering. After consulting Todd Richards, the state's fisheries biologist for our region, we've decided to attempt to document native brook trout on several streams in our watersheds.

So on Sunday, July 11th, we'll divide into small teams and hit as many promising streams (with rods in hand) as our numbers permit. The goal is to augment existing documentation for natives, and hopefully document the presence of salters in some of these streams as well. We will forward our results to Todd Richards and other appropriate parties.

Here's the general plan which we'll obviously refine over the next couple weeks:

- ✍ We'll meet at 8AM at a location To Be Determined, divide into teams and travel to and fish the assigned water.
- ✍ We'll reconvene at Noon at the same location where (weather permitting) for \$5 you can join us for a cookout.
- ✍ Most of the streams we are currently considering for surveys are tributaries of the Merrimack River. If you have any suggestions on other streams, please let me know.

If you are interested in participating in this event, please let me know so we can plan appropriately.

Thanks for your time.

As always, please don't hesitate to get in touch with any questions or comments.

Hope to see you soon,

Kevin Correa
